Crème fraîche

By Miele

5 minutes

Preparation time

5 hours

Cooking time

500g

Serves

INGREDIENTS

600ml thickened cream 35%

2 tablespoons cultured buttermilk

METHOD

1. Pour cream and buttermilk into a jug and stir until fully combined.
2. Divide mixture into 4 sterilised 125ml capacity glass jars.
3. Cover with jar lids until finger tight.
4. Place jars onto a perforated steam tray. Steam at 40°C for 5 hours.
5. Allow the crème fraîche to set in the refrigerator before use.

Note

- Live yoghurt can be substituted for cultured buttermilk to start the fermentation in the crème fraîche.
- Good quality preserving jars can be easily obtained from local supermarkets.
- To make vanilla crème fraîche, add 1 tablespoon of vanilla bean paste at step 1. Sweeten with icing sugar to taste before serving.
